***Response to Arguments***

Applicant's arguments filed 9/14/2009 have been fully considered but they are not persuasive.

Applicant argues that INAMA (referred to by applicant as HAJIME), TANI, and '449 (KURODA) fail to disclose a molar ratio of 1 to 70 of tryptophan to polyanionic compound, this is not found persuasive. This is not found persuasive as the examiner holds that it would be obvious to optimize a result effective variable as indicated in the final rejection. Examiner acknowledges that the references do not explicitly disclose the exact molar ratio, that is the why the 103 rejection includes case law that indicates it is obvious to optimize result effect variables. Further, KURODA, TANI and INAMA show that the concentrations of tryptophan to polyanionic compound are result effective variables, as shown in the final rejection (see response to arguments).

Additional arguments addressing the amended claims require further search and consideration.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MARJORIE CHRISTIAN whose telephone number is (571)270-5544. The examiner can normally be reached on Monday through Thursday 7-5pm (Fridays off).
